Precautions

Do not keep the device soaked for long periods of time.

Do not use the device with any type of corrosive liquids or cleaning products that may damage the device.

Do not charge device when charging port is not dry.

Do not disassemble, modify, misuse, or throw the product in any way.

Troubleshooting Guide

1.) Why is my device not responding when pressing power button?

Try charging the battery and then try again.

2.) Why is my device not charging?

Check to confirm that the charging cable is connected and is properly working

3.) Why is the ems not working properly?

Adjust Vibration Speed Control intensity during EMS mode to test if that resolves the problem.

4.) Why does my silicon brush feel sticky or weird?

If the silicon brush deteriorates or becomes sticky due to oxidation or damage, stop using the device immediately.
